

G.H. Raison International Skill Tech University
Introduction to Artificial Intelligence
Unit 1 & 2 Assignment

1. *Define Artificial Intelligence. Give any five definitions of AI.
2. *Explain any five applications of Artificial Intelligence with suitable real-world examples.
3. Explain the history and evolution of Artificial Intelligence.
4. *Differentiate between Hard AI (Strong AI) and Soft AI (Weak AI) with suitable examples.
5. Explain the foundations, goals, current trends, challenges, risks and benefits of Artificial Intelligence.
6. *Describe Turing Test with suitable example.
7. Describe the concept of Intelligence and Intelligent Behaviour with suitable examples.
8. Define an Intelligent Agent. What is a Task Environment?
9. Explain the Turing Test with a neat diagram.

10. *Explain the Goals of Engineering-based AI with any one suitable example.
11. *Explain the concept of Intelligent Agents. Draw and explain the structure of an intelligent agent.
12. *Describe the thinking humanly (cognitive modeling) approach with suitable example.
13. *Explain the Learning AI agent architecture.
14. Explain the structure of an Intelligent Agent and discuss the different types of agents with suitable examples.
15. Explain the various approaches to Artificial Intelligence and discuss the characteristics of a Rational Agent.
16. Explain Artificial Intelligence. Discuss its advantages, disadvantages, and applications.
17. Discuss the current status, trends, challenges, and future scope of AI
18. Explain the goals and foundations of Artificial Intelligence with suitable examples.
19. Explain the risks and benefits of Artificial Intelligence in today's world.
20. Differentiate between Simple Reflex, Model-Based, Goal-Based, Utility-Based, and Learning Agents.
21. Explain the concept of Task Environment and PEAS representation with an example.
22. Explain the Laws of Thought approach and Cognitive Science approach in Artificial Intelligence.
